 ED 600: Intro to Doctoral Research
 Online Lecture June 5, 2020

10/10 student responses received

Survey Item	Scale	<i>Strongly Agree</i>	<i>Agree</i>	<i>Below Agree</i>
The guest lecture was a valuable learning experience	5-point: <i>Strongly Agree to Strongly Disagree</i>	N=9	N=1	N/A
The instructor was an effective communicator	5-point: <i>Strongly Agree to Strongly Disagree</i>	N=9	N=1	N/A
The instructor maintained an environment that helped me learn	5-point: <i>Strongly Agree to Strongly Disagree</i>	N=7	N=3	N/A

Please describe any strengths of the instructor and/or the lecture that you observed

- Confident presenter!
- I appreciated the time to work on my concept map, with you available if I needed. I also enjoyed connecting with a partner to talk about it. Both excellent teaching protocols!
- You spoke very clear, you were easy to listen to and I liked that you had a friendly nature and casual character that allowed for people to interrupt or ask questions anytime.
Q & A is always great.
- Clarity in voice.
Confidence in materials presented.
- - well spoken
- passionate
- easy to listen to
- had really great strategies to share around concept mapping
- I connected strongly to the way she conceptualized the literature
thank you
- Annie was great. Loved seeing her process with conceptual mapping. I will employ her strategies (to post and reflect/revisit). I think it is great to have a constant visual of the thoughts and capturing the thoughts throughout this process. Also, extremely generous offer to reach out to her for advice and support. I will tap into her vast knowledge.

- The examples provided were authentic and meaningful.
I really appreciated the opportunity to practice completing a Venn diagram with our own information.
- Positive voice. Understands the needs of a doctoral student.
- Clear, articulate, strategy-based
- Annie is organized and clear in her instruction. She provides many examples from her own experience as a doctoral researcher and encourages students to find their own methods that work for them. She is kind, calm, and encouraging. She is open and approachable.

Please describe any changes or additions you would suggest

- None
- none.
- Those Conceptual Map Pics (templates) would be great in a larger format. Tips n Tricks for the stage you are at...defending your dissertation. Maybe links to 'videos' of past dissertations if we cannot attend online ones now?
- I appreciated the "practice" time. It would be great to build in some time to come together and talk after we worked.
- We need more time with you!
- None, it was great! Thank you so much!
- With more time, I think modeling her thinking by creating a mind map in real time and walking through the thought process would be helpful. Annie is obviously very intelligent and able to connect and synthesize ideas so it would be nice for students to hear and see it happen.
